(a) Detailed R3000 pipeline

(b) Modified R3000 pipeline with reduced latencies

(c) Optimized R3000 pipeline with parallel TLB and cache accesses

IF	=	Instruction fetch
RD	=	Read
MEM	=	Memory access
WB	=	Write back
I-Cache	=	Instruction cache access
RF	=	Fetch operand from register
D-Cache	=	Data cache access
ITLB	=	Instruction address translation
IDEC	=	Instruction decode
IA	=	Compute instruction address
DA	=	Calculate data virtual address
DTLB	=	Data address translation
TC	=	Data cache tag check

Figure 12.9 Enhancing the R3000 Pipeline
